SYSTEMS, NETWORKS & SECURITY APPRENTICE

BUT Networks & Telecommunications, Cybersecurity track · IUT Annecy · apprenticeship until July 2027

Within the small IT team of a multi-site industrial group, I run and evolve the infrastructure day to day: directory services, virtualization, backups, monitoring, and endpoint and server security.

GOAL I'm looking for further studies in cybersecurity (master's or engineering school), ideally as an apprenticeship, from September 2027.

PROJECTS ON THE JOB

EDR migration: WithSecure → Trend Micro Vision One **BUT thesis**

Replacing the group's endpoint and server protection, from the comparative study to daily alert triage with an external SOC.

Trend Micro Vision One · Apex One · Deep Security · Active Directory · Windows Server

Redundant Active Directory across 7 sites

From a single Windows Server 2016 domain controller to a two-DC architecture, including a new Windows Server 2025 one, with centralized DHCP in failover.

Windows Server 2016 / 2025 · Active Directory · DNS · DHCP · PowerShell · VMware vSphere · Juniper Mist

Zabbix 7 + Grafana monitoring

Set up the group's first centralized monitoring platform, from servers down to UPS units.

Zabbix 7 · Grafana · Debian · SNMP · VMware vSphere · Windows Server

Proxmox VE on an HPE ProLiant DL380 Gen10

Repurposed a server previously running VMware ESXi and HPE SimpliVity into a Proxmox platform for testing and storage.

Proxmox VE · ZFS · VMware ESXi · HPE iLO 5 · Veeam B&R · Debian

Veeam backups: v13 upgrade and hardened repository

Making the group's backup chain more reliable: version upgrade, hardened Linux repository and support for the new Proxmox hypervisor.

Veeam B&R 12.2 → v13 · Linux · Proxmox VE · VMware vSphere

At university: Software-defined radio (SDR) in Python (SAÉ 301, Python, NumPy, SciPy) · CyberZone, a gaming café website (SAÉ 203, HTML, CSS, PHP).
